

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. *(Currently amended)*

A removable container for positioning in the interior of a vehicle which comprises:

(a) a web-like member which comprises a top panel, a pair of side panels, a bottom panel, a front panel and a rear panel, and forms an enclosure;

(b) at least two suction cups which can be removably secured to appropriate locations in the interior of the vehicle without damaging the interior and secure the web-like member in an erect position to the interior of the vehicle; and

(c) a closable opening in the web-like member rear panel which extends from the bottom panel of the container and can be moved to close the interior of the container, the rear panel being removably secured in an upright position to the side panels of the container by one or more removable cords.

2. *(Cancelled)*

3. *(Currently amended)*

A container as claimed in claim [[2]] 1 wherein the web-like member is formed of flexible fabric.

4. *(Cancelled)*

5. *(Previously presented)*

A container as claimed in claim 1 wherein the web-like member is secured to the suction cups by cords.

6. *(Original)*

A container as claimed in claim 5 wherein the cords are elastic.

7. *(Original)*

A container as claimed in claim 6 wherein the elastic cords are secured to the web-like member by detachable fastening means.

8. *(Original)*
A container as claimed in claim 6 wherein the elastic cords are secured to grommets in the web-like member.
9. *(Cancelled)*
10. *(Cancelled)*
11. *(Currently amended)*
A container as claimed in claim [[2]] 1 wherein the web-like member is formed in a general cuboid shape, and the horizontal adjacent edges of the pair of side panels and the top and bottom panels overlap to form horizontal overlapping strips.
12. *(Original)*
A container as claimed in claim 11 wherein grommets are located in the overlapping strips.
13. *(Original)*
A removable container for positioning in the interior of a vehicle which comprises:
 (a) a web-like member which forms an enclosure and comprises a top panel, a pair of side panels, a bottom panel and a front panel;
 (b) at least two suction cups which can be removably secured to appropriate locations in the interior of the vehicle without damaging the interior and secure the web-like member in an erect position to the interiors of at least two windows of the vehicle; and
 (c) a rear panel which can be moved to close an opening in the web-like member.
14. *(Original)*
A container as claimed in claim 13 wherein the web-like member is formed of flexible fabric.
15. *(Original)*
A container as claimed in claim 14 wherein the web-like member is secured to the suction cups by elastic cords.

16. *(Original)*
A container as claimed in claim 15 wherein the elastic cords are secured to grommets in the web-like member.
17. *(Original)*
A container as claimed in claim 13 wherein the rear panel extends from the bottom panel of the container and can be moved to close the interior of the container.
18. *(Original)*
A container as claimed in claim 17 wherein the rear panel is removably secured in an upright position to the side panels of the container by one or more removable cords.
19. *(Original)*
A container as claimed in claim 13 wherein the web-like member is formed in a general cuboid shape, and the horizontal adjacent edges of the pair of side panels and the top and bottom panels overlap to form horizontal overlapping strips.
20. *(Original)*
A container as claimed in claim 19 wherein grommets are located in the overlapping strips.
